

PROGRESS IMPROMPTU

0-100% in 16 Hours

David Ratliff has made a quick recovery since undergoing a kidney transplant in April 2019. David, 39, had been on the inactive list for quite some time but his last check up in April prompted his medical team to move him to the active list. David had no idea that 16 hours later he would be in and out of surgery with a new kidney. David's mom, Ann, got the call at 4:30 a.m. and by 6:00 p.m. that evening, David was on the road to recovery. David said he has more energy, not realizing until now, how awesome it is to wake up feeling 100% better than you did the day before! David is back to work and ready to start traveling again, looking forward to a trip to Branson, MO in November and a Caribbean cruise in December. David participates in P.I.'s hourly Supported Community Living services with supports to enhance his independence in all aspects of life.
