### Member Spotlight

Progress Industries (P.I.) is an IACP member located in Newton. They provide residential, employment and day habilitation services for people with physical, intellectual and developmental disabilities in central Iowa. By utilizing a partnership approach, they assist those they serve by offering training, tools and resources to help to reach their full potential at work, home, and in their communities.

P.I. completed their 5-year periodic Home and Community Based audit review in June. They received 100% in quality outcomes with zero corrective actions to the HCBS 24-Hour and Hourly services provided in both Polk and Jasper Counties and Day Habilitation and Supported Employment services they provide in Jasper and Poweshiek Counties.

The HCBS Specialist was extremely complimentary of P.I.'s organizational policies, documentation, and overall service delivery. This significant accomplishment demonstrates the dedication of P.I. employees to the continued success of the agency and the individuals served at P.I.

Congratulations to P.I. and their team! Thank you for offering outstanding support to the individuals in your community.
